

RTC Environmental Statement

Reinauer is committed to the prevention of pollution through environmentally sound practices. Our operating philosophy emphasizes protecting the environment by managing operations for continual improvement, through quality equipment, maintenance operations and human resources. Reinauer will continue recognizing and exercising its responsibility to minimize environmental risks through the Reinauer Environmental Protection Plan and Formal Risk Assessments.

Environment Protection Plan

Reinauer shall work toward a goal of **Zero Pollution**. The following operating principles reinforce the company's commitment to environmental protection and shall be applied in operations and business planning;

- Operate and maintain our facility and fleet in a manner that protects the environment as well as the safety and health of the work force and the public.
- Continue to work toward pollution-free marine transportation by providing our work force environmental protection education and training: including oil spill prevention, emergency response and an understanding of environmental sensitivities.
- Reduce generation of hazardous wastes through using products that are less toxic to reduce the effect on the environment.
- Comply with applicable legal and other requirements with respect to the environment.
- Strive to meet or exceed our environmental objectives and targets.
- Hold our work force accountable for safety and pollution of the environment.
